

Arabs Travelling in the Desert

Editor's Note. I was very short of a good A3 size picture for this issue but found a tracing of a picture I did c1965. Don't have the picture now. From memory the sky was figured avodire, the sand, planetree and the main camel, olive ash. In contrast the other camels were walnut-ish.

I will leave you to imagine the rest. Remember though, there is a burning hot sun in the sky so keep the contrasts high with plenty of depth in the shadows.
